

AUDIO VISUAL SOLUTIONS FOR SCHOOLS AND ACADEMIES.

“One of the greatest changes can be seen in the lives of children and young people, who are at ease with the world of technology... Yet the classrooms of today don't reflect these changes... While there has been significant investment in technology in education, it has certainly not transformed the way that education is delivered”.

The Schools Network Conference

WHO ARE WE? [ESTD. 1954]

Our name goes back to the time when the first Television and radio sets began to find a place in living rooms across the country.

Roy Snelling, our founder, witnessed a paradigm shift; a whole new way to engage audiences and consume information. The same purpose which AV systems can serve in school classrooms. Over the years, we have grown and evolved into a group of diversified companies, including Snelling Business Systems, the UK's leading AV systems provider to the Higher Education, Corporate and Public sectors.

Snelling Education is a part of Snelling Business Systems; and is our dedicated venture to meet the specific Audio Visual needs of schools and colleges across Norfolk and Suffolk. We work with the leading manufacturers of Interactive Displays, Whiteboards, Projection systems, Microphone and Audio systems, classroom furniture and more.

All backed by the 'Snelling Signature of Quality'.

ROY C. SNELLING

1924-2012

His legacy and success was born from the love for what he did, rather than a desire to make money.

R.C. Snelling Charitable Trust

The responsibility of running the Snelling group companies was inherited by a 'charitable trust', which Roy had established specifically to reinvest all profits into their future and give back to the community.

More importantly, the Trust ensures that the group companies are operated in accordance with Roy's beliefs and ethics of 'customer first'.

Why does this matter to you?

Although profitability is important, we are different from other companies who exist to maximise shareholders' wealth and return profits to shareholders. This, for example, allows our staff to freely make recommendations on the right specifications suited to your school's real needs and budget, and not what is necessarily most profitable for us.

This difference has held us in good stead in building long-term relationships with customers over time.

Straight-talking AV experts. Not Salesmen.

Get expert advice on the right technology suited to the specific needs of your school and budget. Our collective experience of the higher education sector means we fully understand the importance of meeting sanctioned budgets, and working with deadlines around term periods and school holidays.

You can rely on us to deliver projects within schedules and causing minimum disruption to on-going classes. For your peace of mind, our engineers are DBS-checked and fully-trained to meet the needs of your project.

Have a project proposal to discuss?

NO PRESSURE. NO OBLIGATIONS: The Snelling way is transparent and customer-centric (as it has always been since Roy's time). Setting up meetings does not obligate you to do business with us, although we welcome all project proposals with interest.

If your requirement is any aspect of
Audio and Visual technology.
We can do it.

UNSURE? GIVE US A CALL.

✓ EXPERT ADVICE

We will begin with a consultation to understand your requirements. We do this to ensure you have all the information you need before making decisions.

✓ LEASING

Fully-compliant with government legislation, we can provide smart leasing options. We have partnered with a UK leading finance provider who specialise in the education sector.

✓ INSTALLATIONS

We will work with you to adopt a flexible approach to the key element of any audio visual integration project - installation. Our engineers are DBS-checked and fully-trained to complete any installation.

✓ ACCOUNT MANAGEMENT

Count on us to be available at all times, before and after an installation project is complete. You will be assigned a dedicated Account Manager to discuss your needs and requirements, as and when they arise.

✓ MAINTENANCE & SERVICE

We can offer maintenance to ensure your equipment is maintained in excellent working order. Outside of such contracts, we can also provide service calls, for those emergencies that need 'fixing right now'.

✓ TRAINING

Post-installation, we can provide training to your teaching staff and administrators. With simple, straightforward guidance your staff will find themselves confident using the installed technology.

No Obligations.

EVERY STEP OF THE WAY

Interactive Touchscreens: Curious?

Hmm..
Interactive
Touchscreens
Are they right for us?

Long lasting.

Touchscreens can last approximately 80,000 hours. That's equivalent to running 24 hours a day, 7 days a week for approximately 9 years.

Installation?

Mount directly onto the wall or on a mobile trolley stand. You can adjust screen height on a stand or on the wall so younger students/students at the back of the class can view them.

My current lesson plan?

Today's touchscreens work across platforms. You can use your lesson plan on the touchscreen itself, or connect your PC to view and edit lesson plans, controlling the cursor by touch instead of a mouse.

Direct/indirect sunlight?

Unlike Projectors, most interactive touchscreens have anti-glare glass.

Maintenance Costs?

Unlike projectors, there are no lamps or filters to replace. Touchscreens also have very few moving parts.
